

ULTRAFAST BROADBAND

Gigabit Capability

As a provider of ultrafast business broadband, Albany Technology has partnered with Faster Britain to make it easier for your organisation to benefit from full fibre connectivity. Let your business thrive on a highly reliable network and future-proof your growing technology needs.

AT

GROW YOUR BUSINESS CAPABILITIES

Why Choose Faster Britain?

Faster Britain works with telecoms and technology partners to deliver ultrafast, full fibre connectivity into businesses of all sizes, from SME to Large Enterprise, across the UK. The network is building at pace and excelling in the competition for business-grade fibre infrastructure roll-out.

**Faster
X
Britain**

The Faster Britain network gives your business the same upload speeds as the advertised download speed - ensuring your business can rely on the internet connection for calls and video.

Network

Designing, building and operating ultrafast networks, driven by partner and business requirements.

Experts

The best minds in the industry cooperating, innovating and bringing fibre to under-served areas across the UK.

Collaborate

Working with businesses, local authorities and partners to extend the Faster Britain network by utilising existing infrastructure.

Speed

A track record of connecting businesses to the network in a fraction of the time it takes some competitors.

Environment

Nobody likes disruption, that's why impact on the environment is minimised and reuse is utilised wherever possible.
